Monthly Rider Count in 2022

C. To visualize the number of rides by rider type:

```
divvy_trips_v2 %>%
  mutate(weekday = wday(started_at, label = TRUE)) %>%
  group_by(member_casual, weekday) %>%
  summarise(number = n()
    ,average_duration = mean(ride_length)) %>%
  arrange(member_casual,weekday) %>%
  ggplot(aes(x = weekday, y = number, fill = member_casual)) +
  geom_col(position = "dodge")+
  labs (title = "Average Count of Riders per Day",caption = paste0("Data from: http:
```

```
## `summarise()` has grouped output by 'member_casual'. You can override using the
## `.groups` argument.
```
